

Company's Profile

Concrete Engineering Products Berhad ("CEPCO" or "the Company") was incorporated in August 1982 under the name Speed-Kon Sdn. Bhd., before changing its name to Concrete Engineering Products Sdn. Bhd. in January 1983. The Company was converted into a public company in May 1991 and subsequently assumed its present name. CEPCO was listed on the Kuala Lumpur Stock Exchange (now known as Bursa Malaysia Securities Berhad) Second Board in January 1992 and was transferred to the Main Market in 2009.

The principal activity of the Company is the manufacture and sale of prestressed spun concrete piles and poles. CEPCO's products are widely used in infrastructure, building, and utility projects, both domestically and internationally.

The Company operates three strategically located manufacturing facilities across Peninsular Malaysia, supported by a sales office in Kuching, Sarawak. All manufacturing facilities are certified under SIRIM QAS International's MS ISO 9001:2015

(Quality Management Systems for the Manufacture of Prestensioned Spun Concrete Piles and Poles) and IKRAM QA Services' MS 1314: Part 4: 2004 (Product Certification for Precast Prestensioned Spun Concrete Piles, Class A, B, and C, 250mm to 1,000mm diameters).

In line with its commitment to sustainability and operational excellence, CEPCO obtained certification for ISO 14001:2015 (Environmental Management System) and ISO 45001:2018 (Occupational Health and Safety Management System) in September 2021. These certifications reflect the Company's dedication to managing environmental, health, and safety matters in a systematic and responsible manner.

Over the years, CEPCO has established itself as a market leader in the production of prestressed spun concrete piles and poles, enjoying a strong reputation for quality, reliability, and technical expertise. The Company's products are exported to international markets across Asia, Africa, Oceania, and the Gulf region.

In recognition of its industry achievements, CEPCO was awarded a place in the Malaysia Book of Records in January 2019 for producing the longest prestressed spun concrete pile, measuring 50 metres in length. Further testament to its performance excellence, CEPCO received the Excellent Supplier Award for the East Coast Rail Link (ECRL) Project from China Communications Construction (ECRL) Sdn. Bhd. in March 2023, marking the second occasion the Company has received this prestigious recognition.
